Standard Hood with Baffle Filter

Reliable Grease Extraction for Everyday Kitchen Ventilation

The KVENT Standard Hood with Baffle Filter is a dependable solution for everyday commercial kitchen ventilation needs. Built with heavy-duty stainless steel and high-efficiency grease filtration, it captures grease-laden vapors effectively, helping to maintain clean ducts, reduce fire risks, and ensure a safer and more efficient kitchen environment.

Designed for versatility, this hood is ideal for a wide range of cooking equipment and culinary operations, offering durable construction, easy maintenance, and consistent performance.

Standard Hood with Baffle Filter

Key Benefits

Efficiently captures grease and airborne particulates

Reduces fire hazards by preventing grease buildup in ducts

Easy-to-remove and dishwasher-safe baffle filters

Heavy-duty construction for long-lasting durability

Quiet operation with optimized airflow

Supports cleaner air and improved kitchen hygiene

Standard Hood with Baffle Filter

Reliable Grease Extraction for Everyday Kitchen Ventilation

Ideal Applications

- Restaurants, cafes, and hotel kitchens
- Cloud kitchens and food production facilities
- Fast food outlets and cafeterias
- Any commercial kitchen with moderate to heavy grease production

Restaurants

Fast food outlets

Hotels

Cafeterias
